

Course Announcement - Fall 2017

BCMB 610

(section 002) 1 credit

Tuesdays, 3:40-4:55 pm

Hesler 427

Plant Biology Journal Club

We will discuss recent papers from the primary literature that explain the functioning of plants (from the subcellular level to whole-plant physiology). Possible topics include:

- *signal transduction*
- *structure-function relationships*
 - *gene regulation*
 - *stress responses*
 - *cell biology*
- *developmental processes*
 - *pathogen responses*
 - *nutrient utilization*
 - *bioenergy applications*
